PATENT ASSIGNMENT

THIS PATENT ASSIGNMENT (this "*Assignment*") dated as of April 9, 2003 (the "*Effective Date*"), is made by and between POLYMERIC INTERCONNECT, INC., a Nevada corporation, ("*PII*"), HUGH CRAIG, an individual ("*Craig*") and doing business as SUMMIT VALLEY TECHNOLOGY, a California sole proprietorship ("*Summit-California*", together with PII and Craig collectively, the "*Assignors*"), and DOW CORNING CORPORATION, a Michigan corporation ("*Assignee*").

WHEREAS, Assignors and Assignee are parties to that certain Asset Purchase Agreement, dated as of even date herewith (the "*Purchase Agreement*"), pursuant to which Assignors have agreed to sell and Assignee has agreed to purchase certain assets, properties, rights and interests relating to the "Business" as defined in the Purchase Agreement;

WHEREAS, Assignors are the owners (either individually or through a combination of two or more of them) of the entire right, title and interest in, to and under those United States and foreign patents and patent applications listed on Schedule A and any foreign counterparts or equivalents thereto, existing now or in the future and including, but not limited to, patents of utility, improvement or addition, utility model and appearance and industrial design patents and inventors certificates, as well as divisions, reissues, continuations (in whole or in part), renewals and extensions of any of the foregoing and any patents that may issue from any of the foregoing. (collectively, the "*Patents*");

WHEREAS, prior to the execution and delivery of this Assignment by Assignors to Assignee, Derril Steele has assigned to Craig all of Derril Steele's right, title and interest in, to and under the Patents; and

WHEREAS, Assignee wishes to acquire and Assignors wish to assign all of Assignors' right, title and interest in and to the Patents.

NOW, THEREFORE, for good and valuable consideration (including the premises and covenants set forth in the Purchase Agreement), the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

Assignors hereby irrevocably sell, assign, transfer and set over to Assignee all of Assignors' right, title and interest in and to the Patents, any foreign counterparts or equivalents thereto, existing now or in the future and including, but not limited to, patents of utility, improvement or addition, utility model and appearance and industrial design patents and inventors certificates, as well as divisions, reissues, continuations (in whole or in part), renewals and extensions of any of the foregoing and any patents that may issue from any of the foregoing, and including the subject matter of all claims that may be obtained therefrom, for Assignee's own use and enjoyment, and for the use and enjoyment of its successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignors if this assignment and sale had not been made, together with all income, royalties, damages or payments due or payable as of the Effective Date or thereafter, including, without limitation, all claims for damages by reason of past, present or future infringement or other unauthorized use of

the Patents, with the right to sue for and collect the same for Assignee's own use and enjoyment, and for the use and enjoyment of its successors, assigns or other legal representatives.

Assignors authorize and request the U.S. Commissioner of Patents and Trademarks and any other similar government authority to record Assignee as owner of the Patents, as described in the preceding two paragraphs, and issue any and all patents issued thereon to Assignee, as assignee of the entire right, title and interest in, to and under the same, for the sole use and enjoyment of Assignee, its successors, assigns or other legal representatives.

Assignors shall provide to Assignee, its successors, assigns, and other legal representatives, cooperation and assistance at Assignee's request and expense (including, without limitation, the execution and delivery of any and all assignment documents, affidavits, declarations, oaths, available samples, available exhibits, available specimens and other documentation as may be reasonably required) in connection with (1) the implementation, perfection or recording of this Assignment in the United States and any and all applicable foreign jurisdictions; (2) the preparation and prosecution of any application, continuations, divisions, continuations-in-part, extensions or equivalent to any of the foregoing for any of the Patents; (3) the prosecution or defense of any interference, opposition, re-examination, reissue, infringement or other proceedings that may arise in connection with any of the Patents, including, but not limited to, testifying as to any facts relating to the rights assigned in this Assignment; (4) the prosecution or defense of any interference, opposition, infringement or other proceedings that may arise in connection with the Patents and this Assignment; and (5) obtaining any additional protection that Assignee may deem appropriate which may be secured under the laws now or hereafter in effect in the United States or any other country.

Assignors hereby specifically incorporate by reference all of the representations, warranties and indemnifications applicable to the Patents in the Purchase Agreement.

This Assignment may be executed in any number of counterparts, each of which shall be deemed to be an original, and all of which together shall constitute one and the same instrument.
